

Our Strategy on a Page.

Our Vision.

Sustainable water growing our world.
Mā te tauwhiro wai ka tipu tō tātou ao.

Our Mission.

To supply sustainable water for agriculture, enhance value for our shareholders, and support local communities and the environment.

Our Purpose.

We create collaborative catchment and community-based solutions that transform lives and livelihoods while enhancing natural resources for future generations.

Strategic Priorities.

Secure scheme reliability for the future.
Climate adaption through the supply of sustainable water.
Influencing a connected and healthy environment from mountains to the sea.

Our Principles.

Our decisions align with the life of the scheme (100 + years).
Where possible we will harness the power of collaborative work.
We work in the best interest of shareholders and stakeholders.

Our Corporate Values.

Integrity: We do what is right.
Reliability: We do what we say we will do.
Sustainability: We interact with the environment ensuring future generations flourish.

Our Operating Values.

The health, safety, and well-being of all people who interact with the scheme is paramount.

Intergenerational Outcomes.

100 Year Plan Tenents.

Rangatiratanga Over Freshwater.

Enhance partnerships with Papatipu Rūnanga through mindful stewardship and cultural awareness for lasting collaborative success.

Collaboration and Partnerships.

Foster resilient decision-making, embracing a catchment approach, prioritising reputation, and shareholder satisfaction.

People and Protection.

Cultivate a culture where people thrive and are driven by a shared passion or co-created outcomes.

Growth and Diversification.

We contribute to community resilience and prosperity by delivering value, managing risks effectively, and embracing an agile approach.

Intergenerational Infrastructure.

We build and sustain resilient intergenerational infrastructure striving for efficiencies and leveraging data for continuous improvement.

Sustainability.

We raise the bar by driving continuous climate resilience and best practice to deliver environmental benefits and enhancements.

Innovation and Adaption.

A future-focused, world-class business leading the way across sustainability, diversity, operational practice and technology.
