13. COMPANY'S RIGHT TO CONVEY WATER AND MAINTENANCE

13.1 Where there is an Easement Agreement for existing Scheme Infrastructure in place between the parties as at the date of this Agreement, the provisions of clauses 7.1(h) and 13.2 to 13.7 shall be read subject to that Easement Agreement for the existing Scheme Infrastructure.

13.2 In the event new Scheme Infrastructure is required on the Property the following process shall apply prior to the Shareholder granting the Company a formal registered easement in accordance with clause 13.3 below:

- (a) the Company will provide the Shareholder with a written notice of its intention to locate and install the new Scheme Infrastructure on the Property; and
- (b) the Company will enter into good faith discussions and consultation with the Shareholder in respect of the new Scheme Infrastructure required, including, without limitation:
 - (i) location of the new Scheme Infrastructure;
 - (ii) excavation and works required; and
 - (iii) remedial works to repair, level, re-sow and reinstate the pasture or any other farm asset which is affected after the works have been completed.

13.4 The parties acknowledge that in the event the Company requires access to the Property for the purposes of undertaking construction, installation, operation, inspection and maintenance of Scheme Infrastructure, the Company shall have:

- (a) the right at any time and from time to time without being deemed to commit a trespass (and on reasonable notice in accordance with clause 13.5) to enter upon, along and through the Property to:

In the event it is not possible (determined in the Company's sole discretion) for the Company to give the Shareholder reasonable notice of its intention to exercise its rights under clauses 13.4 above (e.g. emergency repairs or maintenance are required to the Scheme Infrastructure on the Property), the Company may access the Property without any prior notice to the Shareholder.
- 13.6 The Company shall at all times when entering the Property in accordance with this clause 13 give due consideration to the Shareholder's farming operation with a view to minimising disruption to that operation and shall further comply with its obligations (and ensure that the Company's contractors/employees comply with their obligations) under the Health and Safety at Work Act 2015 and all regulations made under that Act.
- 13.7 The Company's liability to the Shareholder for compensation under this clause 13 shall be limited to remedial work required to repair, level, re-sow and reinstate the Property as soon as reasonably possible after the works have been completed and for the avoidance of doubt no compensation shall be payable for consequential loss (including loss of profits/production).

The Shareholder shall comply with the Consent Conditions.

For the full list of the Consents (and the full text of the Consent Conditions) please see the Company website www.cpwf.co.nz.

The Consent Conditions currently include, without limitation:

- (a) The Company must take all practicable steps to:
 - (i) Ensure the volume of water used does not exceed that required for the soil to reach field capacity;
 - (ii) Avoid the application of water onto non-productive land such as impermeable surfaces and river or stream riparian strips;
 - (iii) Avoid surface run-off from irrigation; and
 - (iv) Avoid leakage from pipes and structures,

With “field capacity” being defined as being the moisture content of soils when the addition of further water would result in saturation and/or drainage of water from the soil.

- (b) The maximum application rate shall not exceed 5.18 millimetres per day (or such other rate as may be determined from time to time by the Company’s Consent Conditions), provided that if this application rate is shown to result in the Property exceeding field capacity then the application rate will be reduced accordingly.
- (c) If the water for take and use under the Consent is used concurrently with water abstracted from groundwater, the combined volume of water used on the Property shall not exceed 6,250 cubic metres per hectare between the 1st of July and the following 30th of June.
- (d) Best management practices shall be implemented on the Property to minimise the loss of nitrate-nitrogen to soil drainage water, and to minimise any loss of sediment, phosphorus or nitrogen to surface waters.
- (e) All stock shall be excluded from waterways and wetlands (including drains and races) that are within or immediately adjoining the land being irrigated.
- (f) Prior to and during the take and use of water from the Scheme, there shall be a FMP prepared, produced, maintained and implemented for the Property which shall cover the total farm Property (including areas not using water authorised by the Consent).
- (g) A copy of the FMP must be kept by the Company and supplied to the Canterbury Regional Council on request.
- (h) All practices and procedures set out in the FMP shall be implemented and complied with by the Shareholder.
- (i) The FMP shall be audited by a suitably qualified independent assessor appointed by the Company to ensure compliance with the FMP and the Consents. For the first two years of using Scheme water the Property will be audited annually. Thereafter, where the criteria as

set out in the Consent has been met for two consecutive years, each FMP must then be independently audited, including a site visit, at least once every three years. However, audits will continue annually where there is non-compliance with the criteria as set out in the Consent.

- (j) If there is a change in the ownership of the Property, a change in key management staff, if the three yearly audit or any of the Company's annual reports indicate a failure to fully implement the FMP or any other non-compliance with the criteria or the terms and conditions as set out in the Consent, then annual independent audits will be again required until full compliance has been achieved for two consecutive years of independent audits.
- (k) Following each independent audit, areas of non-compliance shall be identified and the Shareholder will as soon as practicable and in any case prior to the next 31st of August ensure that it is fully compliant with all identified areas of non-compliance.
- (l) If the Shareholder is not fully compliant for two consecutive Irrigation Seasons, then no water shall be supplied to the Property until it can be demonstrated to the satisfaction of the Company that changes are implemented to ensure that all practicable measures are in place to comply with the criteria specified in the Consents.
- (m) The Shareholder will only use land outside the Scheme within the Te Waihora/Ellesmere Zone area of the Christchurch – West Melton Zone area (as defined in Figure 1 of the Canterbury Water Management Strategy Strategic Framework November 2009) for wintering of stock where the property has a FMP or other requirement that incorporates best management practices for the management of the stock and nutrients.
- (n) The Shareholder shall supply to the Company and allow the Company access to the Property in order to gather data to demonstrate the average total nitrate nitrogen soil drainage information as required by the Consent in order to prepare the annual report to be supplied to the Canterbury Regional Council and to ensure compliance and environmental monitoring.
- (o) The Shareholder will not be supplied water in the event the Shareholder is causing significant adverse localised effects resulting in breaches of the Drinking Water Standards for New Zealand 2005 (revised 2008), land drainage problems, or adverse environmental effects to surface waterways, including any breaches of relevant water quality standard defined in Tables WQL5, WQL6 or WQL16 of the Canterbury Natural Resources Regional Plan Chapter 4: Water Quality – Operative 11 June 2011 (or such revisions or replacements of these standards and plans), unless the effects are considered adequately mitigated to an extent that it is acceptable in the opinion of the Company.
- (p) The Shareholder will allow the FMP, audit report, audit summary reports and other assessments necessary in respect of the Property or information on the previous Irrigation Season to be provided to organisations identified by the Consents and appeal agreements.

SCHEDULE 5

Terms of supply of stored water from Lake Coleridge (Trustpower water)

1. Definitions

In this Schedule:

Additional Stored Water means, for the Shareholder and an Irrigation Season, the volume of Trustpower Water that is two times the Shareholder's Contract Water for that Irrigation Season.

Contract Water means, for the Shareholder and an Irrigation Season, the volume of Trustpower Water nominated or deemed nominated by that Shareholder in accordance with clause 2.1 of this Schedule, but which may not be decreased for that Irrigation Season or any subsequent Irrigation Season other than in accordance with clause 6 of this Schedule.

Trustpower Agreement means the stored water release agreement between Trustpower Limited and the Company dated 31 May 2013 (as amended and/or supplemented from time to time).

Trustpower Water means stored water from Lake Coleridge (Trustpower water).

2. Contract Water

2.1. The Shareholder must notify the Company of its nominated Contract Water for the first Irrigation Season in which the Shareholder requires Contract Water by no later than the preceding 15 June. Prior to July 2024, the Shareholder may increase its nominated Contract Water for an Irrigation Season by notifying the Company of the increased amount by no later than the preceding 15 June. If the Shareholder does not nominate increased Contract Water for an Irrigation Season by the preceding 15 June, its nomination for that Irrigation Season will be deemed to be the same as the last nomination given by the Shareholder under this clause 2.1.

2.2. The Shareholder acknowledges that, subject to clause 6 of this Schedule, once it has nominated a volume of Contract Water, it may not reduce its commitment to pay for that volume of Contract Water in that Irrigation Season or any subsequent Irrigation Season, irrespective of whether the Shareholder actually orders that water during the relevant Irrigation Season.

3. Additional Stored Water

3.1. A Shareholder may request the Company to provide it with Additional Stored Water in addition to its Contract Water. The availability of Additional Stored Water is not assured and the Company will not be committed to provide the Additional Stored Water in a particular Irrigation Season unless:

- (a) the Shareholder notifies the Company by the preceding 15 August that it wishes to reserve a particular volume of Additional Stored Water for the following Irrigation Season; and
- (b) the Company confirms that the requested volume of Additional Stored Water is available to be reserved, and has been so reserved for that Shareholder for that Irrigation Season.

3.2. The Company reserves the right to charge an Additional Stored Water Reservation Fee of 1c per cubic meter of water reserved by a Shareholder under clause 3.1.

- 3.3. If the Shareholder does not reserve the Additional Stored Water in a particular Irrigation Season the amount of Additional Stored Water available will be subject to availability and will depend on the amount Trustpower elects to make available to the Company at the relevant time.
- 3.4. Notwithstanding clause 5.7 of the Agreement, the charges for Additional Stored Water shall only be payable where the Shareholder orders that Additional Stored Water.
- 3.5. Contract Water will be utilised before Additional Stored Water.

4. Charges

- 4.1. The Shareholder shall pay stored water charges to the Company in accordance with clause 5 of the Agreement.
- 4.2. The charges for Trustpower Water are:
 - (a) Contract Water: 8c per cubic meter; and
 - (b) Additional Stored Water: 8c per cubic meter,
 as adjusted in accordance with clause 4.3.
- 4.3. The charges for Trustpower Water shall be increased with effect from 1 August in each year, in accordance with the following formula:

$$N1 = Nx \left[\frac{A}{B} \right]$$

Where

N = \$0.08 or \$0.01 as the case may be

A = the CPI for the quarter ending on 30 June prior to the relevant Irrigation Season

B = the CPI for the quarter ending on 30 June 2012, being 1168

Provided that N1 cannot be less than N.

Note: Charges for Stored Water for the 2015/2016 Irrigation Season were 8.2c per cubic meter.

- 4.4. Charges for Contract Water will be invoiced in seven equal instalments from October to April (inclusive). Additional Stored Water will be invoiced monthly based on orders made. Charges for Trustpower Water are stated exclusive of GST and GST shall be payable by the Shareholder.

5. General

- 5.1. The Shareholder must notify the Company of its daily order for Trustpower Water in accordance with the Company's operational protocols (as advised to the Shareholder from time to time). The Shareholder will be charged for Trustpower Water based on the volume ordered or nominated, regardless of the volume actually used.
- 5.2. Trustpower Water is available during the period commencing on 1 October of each year and ending on 30 April of the immediately following year.

5.3. Trustpower Water will only be delivered to the Shareholder where:

- (a) the Company has the right to request the release of stored water from Lake Coleridge under the Trustpower Agreement;
- (b) water is available for that purpose under the Trustpower Agreement; and
- (c) the supply to the Shareholder is as contracted with the Company and requested by the Shareholder.

In particular, Additional Water is provided on the basis set out in clause 3 of this Schedule and is not assured to be available under the terms of the Trustpower Agreement.

5.4. If only part of the Trustpower Water requested for release is available on any particular day, the Company may reduce the Shareholder's order for Trustpower Water for that day pro rata in accordance with the total orders of Trustpower Water by shareholders of the Company for that day.

5.5. If the amount of Contract Water nominated by all shareholders of the Company exceeds 75 million cubic meters the Company may reduce the Shareholder's nominated amount of Contract Water pro rata.

5.6. The Company may at any time review and amend the terms and conditions relating to the Trustpower Water.

6. Transfer of Contract Water

6.1. The Shareholder may transfer all or part of its rights and obligations to nominate, order, take and pay for Contract Water (and corresponding Additional Stored Water) for an Irrigation Season together with all or part of its rights and obligations to nominate, order, take and pay for Contract Water (and corresponding Additional Stored Water) for all future Irrigation Seasons to another shareholder of the Company provided that by the preceding 15 June:

- (a) the Shareholder notifies the Company of the proposed transfer;
- (b) the Shareholder and the proposed transferee have signed a transfer document in a form approved or provided by the Company; and
- (c) the Board has approved the transfer (at its absolute discretion).

Clause 6.2(b) of the Agreement shall not apply to any transfers permitted under this clause.
